Handicare 2000 Simplicity

Curved stairlift

The benefits of the Simplicity seat and 2000 curved stairlift system from Handicare

If you are thinking about installing a stairlift, and your stairs turn corners or are spiral, Handicare's Simplicity seat and twin tube stairlift system offers you a safe and reliable solution.

Handicare's stairlifts have helped thousands of people overcome the problems posed by going up and down their stairs at home.

When installed, the practical Simplicity seat it offers you all the standard functions that you would expect plus the choice to upgrade to a powered footplate so that folding the seat will automatically fold the footplate too. This means you do not need to bend to fold and unfold your footplate.

Supplied in a neutral shade (Bute) with wipe clean upholstery and a choice of three standard track colours (Light Grey, Gun Metal and Brown) the Simplicity seat and 2000 twin tube stairlift lift system will compliment most colour schemes.

All Handicare stairlifts have a battery backup which means that your stairlift will continue to work in the event of power cut so you do not need to worry about being stranded up or downstairs.

Handicare's twin tube stairlift system suits most staircases with bends or corners and offer's you the world's tightest internal bend. The compact unit folds up leaving the staircase free for other users and the bespoke track is designed to fit your individual staircase and maximise clear space on the stairway.

Fitted to the stairs, not the wall, it is unlikely you will need to redecorate following the installation of your Handicare stairlift. Your Handicare stairlift will also come with two remote controls which means that, once folded, you can easily send it to the upstairs charge point freeing up space in your hallway and on your stairs.

Safety as standard

Your Handicare stairlift will come with safety sensors that are designed to stop your stairlift if it meets any obstruction as you travel up the stairs and will come with a retractable seatbelt as standard.

Easy to use

The operating toggle is easy to use, simply hold it in the direction you wish to travel, up or down, and your Handicare stairlift will move smoothly and gently on its way.
